👤 Introduction

I'm a Hungarian software engineer and full-stack web developer proficient in PHP, Node, Go, and Python. I believe that software should be fast, intuitive, simple, and secure, so I always do my best to deliver professional and highly scalable web applications. Teamwork is very important to me because I believe that more hands means better results. I'm keen on getting acquainted with new ideas and solutions as it contributes to the professional growth of both me and my team.

📁 Experience

Full-Stack Web Developer at IntoMedia Group

📍 Szombathely, HU (remote work) ⌚ 2013 - Present

- Designed responsive and modern websites for clients all around the world
- Developed professional frontend solutions in Go, Node, PHP, and Python
- Contributed to the development of scalable API-driven applications
- Participated in several development-related in-team discussions

Localization Project Manager Intern at uCoz Media

📍 Moscow, RU (remote work) ⌚ 2013 - 2017

- Submitted Hungarian UI translations for the company's projects
- Contributed to increasing the project's awareness in the Hungarian markets
- Obtained new users and provided technical support
